## Minister's Introduction

Diversification That's the trend in Saskatchewan manufacturing. Every year we produce a greater quantity and a wider range of goods and services.

And this Guide is your comprehensive listing of our current manufacturers, their products and their expertise.

You can use the Guide to select manufacturing sources; to identify potential customers; to locate partners for joint ventures, and suppliers for new products and projects.

Whether you're buying, selling or investing, Saskatchewan manufacturers merit your consideration.

If you need additional information on any aspect of our manufacturing sector's capabilities and potential, I invite you to contact us.

# Explanatory Notes:

Information in this guide was obtained from Saskatchewan manufacturers through questionnaires and telephone interviews. Saskatchewan Economic Development and Tourism gratefully acknowledges their cooperation.

Exporters, for the purposes of this guide, are defined as firms that export to other provinces in Canada as well as to other countries.

**S.I.C. = Standard Industrial Classification.** This listing identifies the products manufactured in Saskatchewan by major industrial grouping as defined by the 1980 Standard Industrial Classification Manual. The Standard Industrial Classification Manual is a publication of Statistics Canada.

**B.O.S.S. = Business Opportunites Sourcing System.** This system provides information on companies and products on a Canada-wide basis. It is designed to bring buyers and sellers together in both domestic and international markets. Saskatchewan companies that are identified as B.O.S.S. registrants are included in this national data bank of information and are included in the B.O.S.S. publications and catalogues.
